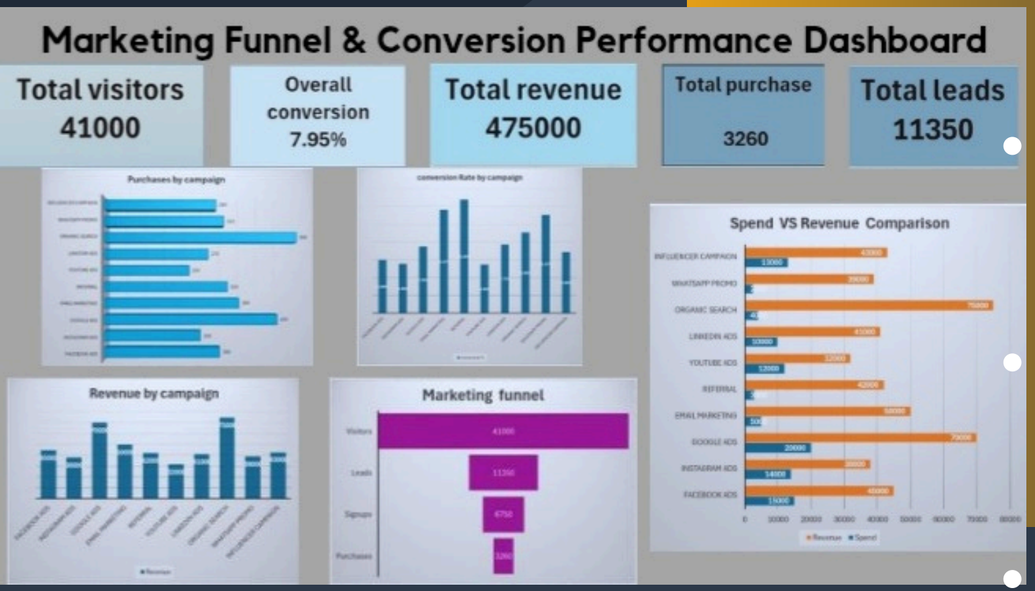
MARKETING FUNNEL & CONVERSION PERFORMANCE DASHBOARD

Shraddha Wagh
Data Analyst Internship (Future Interns)
Tools Used: Power BI / Excel
Date:-20-04-2026

PROJECT OVERVIEW



- This project focuses on analyzing the Marketing Funnel & Conversion Performance Dashboard to understand user behavior across different marketing stages.
- The main objective of this analysis is to evaluate how effectively users move through the funnel from impressions to final conversions.
- The dataset contains marketing and user journey data, including impressions, clicks, leads, conversions, and campaign sources.
- The goal of this project is to improve conversion rate by identifying drop-off points and optimizing marketing performance using data insights.

PROBLEM STATEMENT

- Despite receiving high website traffic, the overall conversion rate remains low, indicating inefficiencies in the customer journey.
- Significant drop-offs occur at different stages of the marketing funnel, reducing the number of final conversions.
- It is important to identify the weak stages of the funnel where potential customers are leaving.
- Improving funnel performance can help increase ROI from marketing campaigns and overall business growth.

PROJECT OBJECTIVE

- Analyze the complete marketing funnel performance across all stages of customer engagement.
- Track the user conversion journey from impressions to final conversions.
- Identify key drop-off points where potential customers exit the funnel.
- Improve overall conversion efficiency through performance insights and optimization strategies.
- Support data-driven marketing decisions for better campaign results and business growth.

KPI CARDS EXPLANATION

- Represents the total number of users who visited the website or landing page. It helps measure overall traffic and campaign reach.
- Shows the number of visitors who expressed interest by filling forms, signing up, or sharing contact details. This indicates lead generation performance.
- Displays the number of users who completed the final purchase action. It reflects the success of converting leads into customers.
- Represents the total income generated from all successful purchases. It helps evaluate the financial performance of marketing campaigns.
- Measures the percentage of total visitors who completed a purchase. It indicates the overall effectiveness of the marketing funnel.

Total visitors
41000

Total leads
11350

Total revenue
475000

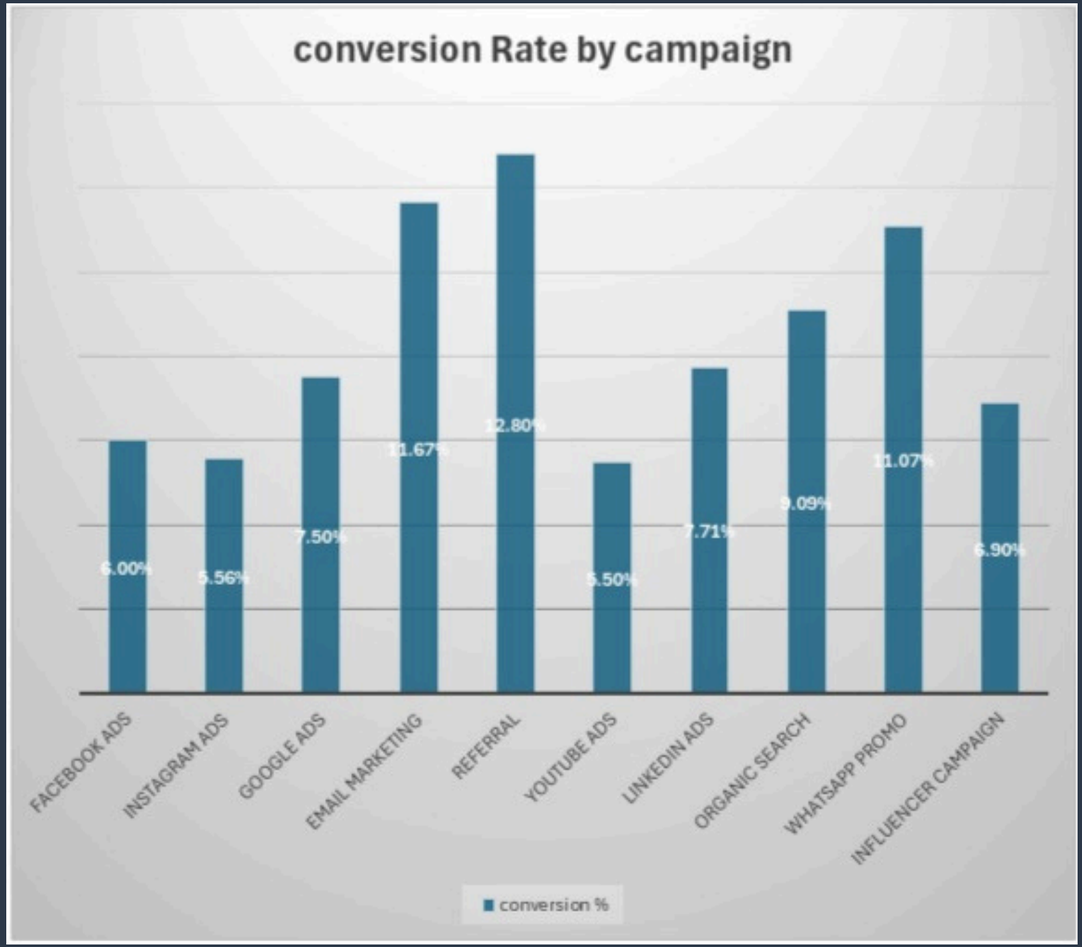
Total purchase
3260

Overall conversion
7.95%

PURCHASES BY CAMPAIGN

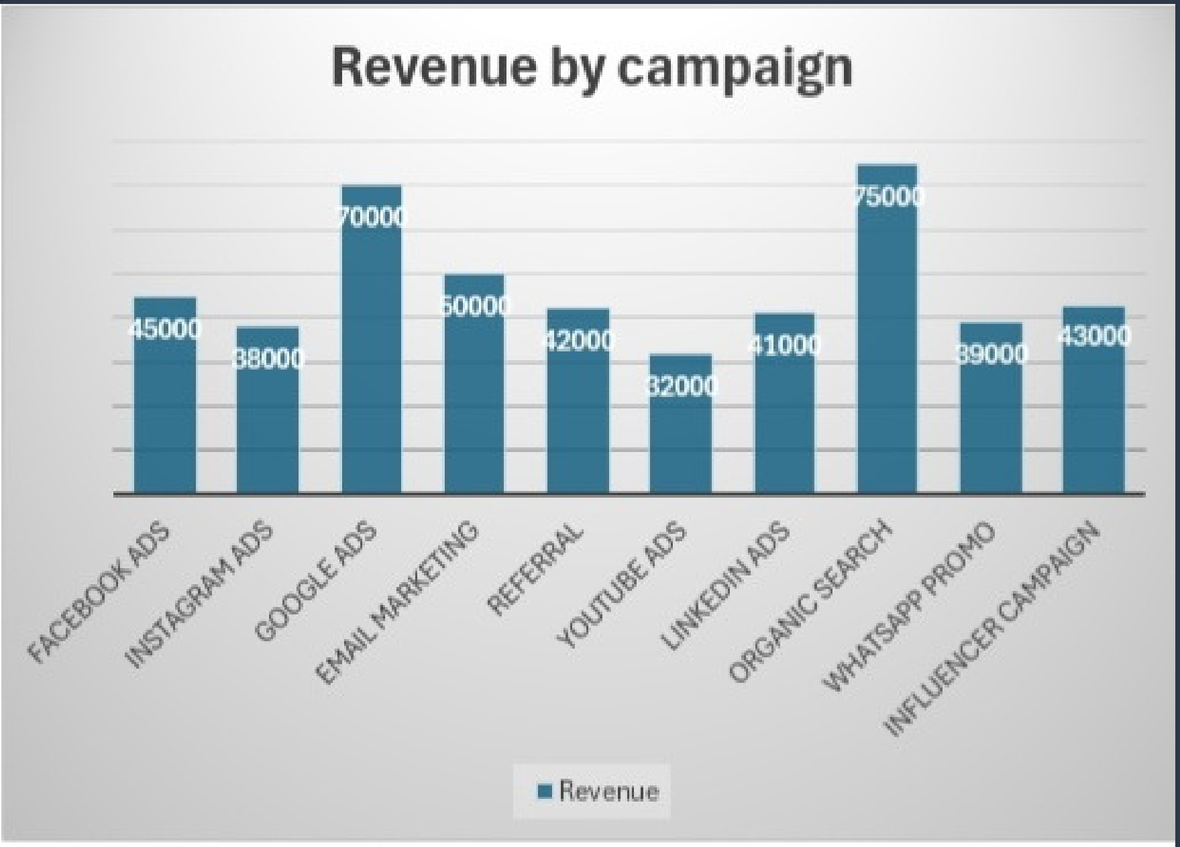
This chart shows the number of purchases generated by different marketing campaigns. Some campaigns perform significantly better than others in converting visitors into customers. It helps identify the most successful campaigns and where future marketing budgets should be focused.

CONVERSION RATE BY CAMPAIGN



This chart compares the conversion rate of each campaign. It highlights which campaigns are more effective in turning visitors into leads or purchases. Higher conversion rates indicate better targeting, messaging, and customer engagement.

REVENUE BY CAMPAIGN

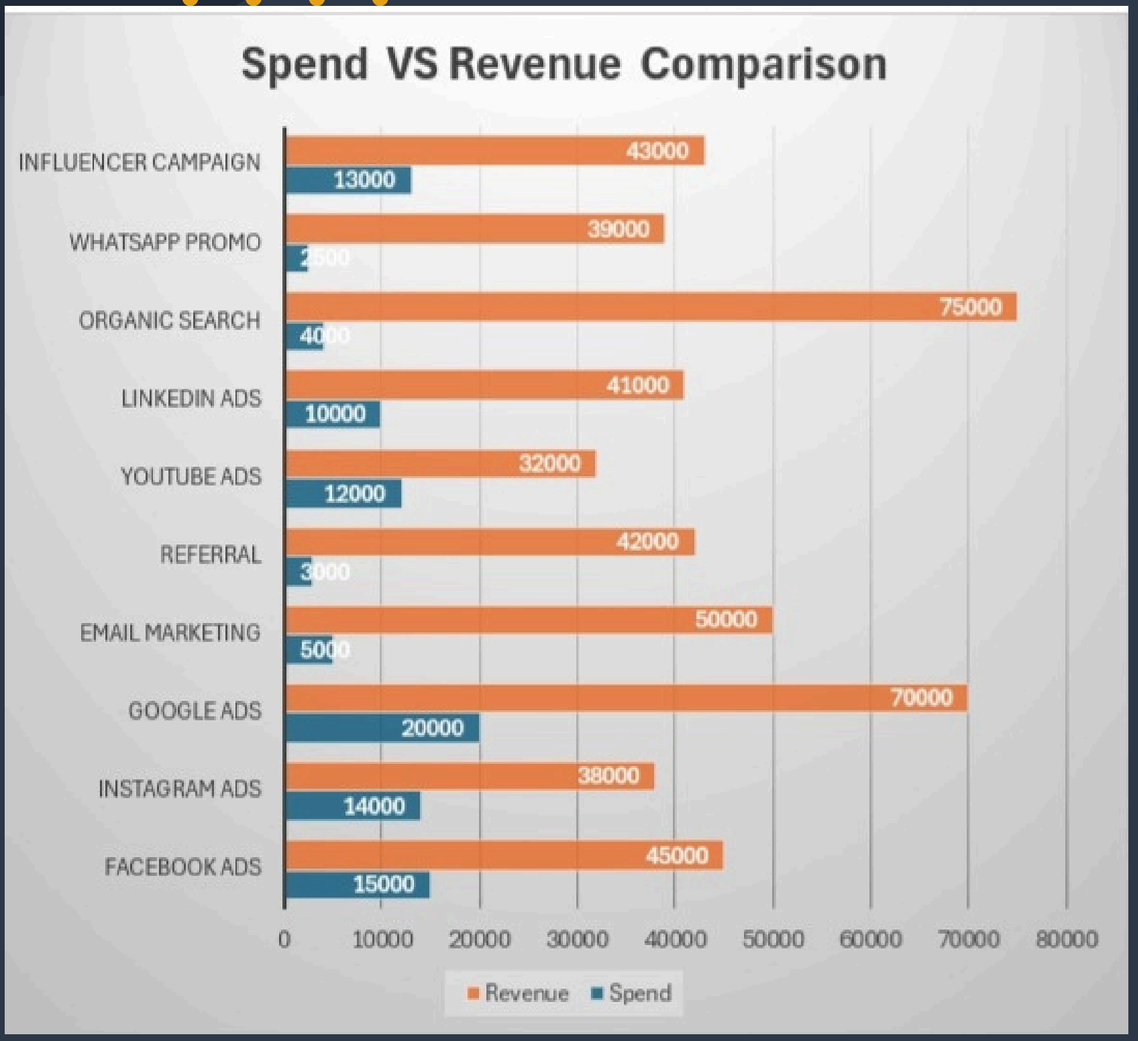


This chart represents the total revenue generated by each marketing campaign. Certain campaigns contribute more revenue than others, helping businesses understand which channels provide the highest financial return.

MARKETING FUNNEL

This funnel chart visualizes the customer journey from Visitors → Leads → Signups → Purchases. A gradual drop is seen at each stage, showing where potential customers leave the process. It helps identify bottlenecks and improve conversion efficiency.

SPEND VS REVENUE COMPARISON



This chart compares marketing spend with revenue earned across campaigns. Campaigns where revenue is much higher than spend are more profitable, while low-return campaigns may need optimization or budget adjustments.

CONCLUSION

The Marketing Funnel & Conversion Performance Dashboard provides valuable insights into customer behavior, campaign effectiveness, and overall conversion performance. Through KPI analysis and campaign comparisons, it becomes easier to identify high-performing channels and weak stages in the funnel.

The dashboard helps businesses make data-driven decisions, optimize marketing strategies, improve ROI, and increase conversions through better resource allocation and targeted improvements.

THANK YOU

Thank you for reviewing my project presentation.
I appreciate your time and attention.
